Serial Nos Six. 60

Part B for Aug 44

SUBJECT

Training of the Sanitary Inspectors of different municipalities in the Compost scheme

No action for the present

5

All India compost manure scheme

The following is the extract ~~taken from the~~ relating to Tsg taken from the minutes of the file No Agri L 45/42 on the subject -

From the Secy, I C A R
No 7 41/3/42-A dt 2-4-43

Re two production drive - grant for composting town refuse into manure

Paras -

1) 1) It is stated that the improved process of composting Town refuse has been evolved at the Indian Institute of Sciences. It is therefore contemplated by the I C A R to start a scheme ~~to~~ for the rapid introduction of the process of converting town refuse into manure in all the important municipalities of the country. The scheme as mentioned ~~to~~ covers a period of two years

CW 9/4 L 5/4 5) The Department may agree to cooperate in the scheme with advantage only half the cost of the establishment devolves in Mysore in the 2nd year this is approximately Rs 6,000/- of becomes due during the year 1943-44 Moreover, this special staff can be conveniently used for this type of intensive work in the Rural development scheme

(3) 7) For the purpose of the scheme, Mysore may conveniently be divided into four centres -
(1) Bangalore - comprising of Bangalore, Kolar & Tumkur Dists
(2) Mysore - comprising of Kadur Mysore & Mandya
(3) Chitradurga - " " of Kadur & Hassan

(4) Shimoga – Shimoga & Chitaldrug Distts.

Two from Asst Dirs – chemists to be appointed will be placed at these centres

(4) 8) These officers will organise & supervise the making of compost at selected centres in the city and town municipalities they will train the labour and mistries at the compost yards of the mills, the cost of the special labour being met by the mills themselves the small cost of manufacture is easily recouped by the sale proceeds of the manure In the case of the Tyre mills, composting of town waste is already in progress In view of the increased demand for bulk manures & their limited availability, the mills may be willing to profit by converting town waste & into valuable manure The cooperation of the mills is necessary for the success of the scheme and it would be desirable to consult them in the matter

(5) Director of Agriculture

(5) 9) of approved, copies of the letter from the I C A R will be forwarded to the Jnl Comm Bangalore & the Pol city mills, Tyre & chairman I C & Sanitary Boards & their views obtained

(Govt) Asst Secy I & C. 22-4-43

(6) It seems unnecessary to consult the municipalities

at this stage (3)

(Ind) Gen secy 24/4

(7) 11) According to the Dirce of Agricultures, the State liability during 44-45 will come to about Rs 6,000/- The several millers who agree to the scheme will realise some money out of the sale of manure manufactured under the supervision of the Officers of the Agr Dept it would be quite in order if the pay of these Officers is proportionately borne by them

(Ind) Fin Secy 26/4

(8) 37) The programme of the training is contained in Enclosure I According to it 8 chemist and 16 Asst chemists will be trained during the I year Asst Biochemists train up during the II year, 18 sanitary inspectors selected from millers

(9) 38) (3) A subsidy of Rs 1250/- has been provided for being given to one ~~mill~~ miller for six months and 3 millers for three months at Rs 100/- each per

(10) 39) The proposal of this Govt was to constitute 4 centres for working the scheme, whereas only 3 centres have been sanctioned by the

G C A R

C W

~~28 43~~

43) ~~The D P H and the presidents~~

(11) The Director may now be asked to consult the D P H and the Pdts of Mittees re the training of sanitary inspectors and the details of expenditure & submit proposals to govt early before the training of the Bio-chemists is over

(12) 44) At the end of the second year, there will be 18 Mittees Working & under 18 Sanitary Inspectors supervised by 3 Asst Chemists as suggested by the Food secretary at para 11 supra, the question of apportioning the cost between the govt & Mittees entirely debiting it to the Mittees will have to be examined then During the period of training in the first year, the I C A R are paying a subsidy of Rs 1250/- to four Mittees for short periods It seems practicable to ask the Mittees concerned to bear the expenditure on ~~account~~ account of the pay of the sanitary inspectors etc

(13) 45) The Law section may be consulted

(Sd) Asst Secy, Hfw 3/7/63

Law ~~section~~ secretary with compliments for favour of remarks

(Sd) Dy Secy 8/7

(14) 48) The names of Mittees to which the scheme in question would be made applicable will have to be decided after the training of the Biochemists is over. Necessary action will be taken

to consult the local body concerned, after the scheme is introduced in regard to the expenditure to be incurred by the Govt in this behalf

(Sd) GR (Asst Secy Leg) 10/7/43

(Sd) CWS 12/7 (Secy, Law)

(15) 92) Regarding the training centres, the note of Dr C N Achaya, Chief Biochemist states that Mysore city has been selected as the centre for the training of Asst Food Chemists and the Mysore city, Bangalore city & Shimoga Town would be the centres for the training of Sanitary Inspectors.

C W 7/12/43

(16) 131) submitted A copy of this has already been sent to the Secretary, Law Dept. the Leg Branch may perhaps be requested to take relevant extracts and take action for consulting the Municipalities and for intimating the names of the Municipalities which are willing to send their Sanitary Inspectors for training under the scheme as also the assent of the Municipalities of Mysore, Bangalore & Shimoga for affording facilities for the training of the Sanitary Inspectors ie to form Mysore, Bangalore & Shimoga as training centres

C W 26/1/44

(17) 132) In favour of necessary action & return

Indias enclosure information in the matter

34) The report received from the P.D.T., Coimbatore District shows that they have agreed to give their full support to the successful operation of the scheme at the place

35) As regards the posting of a substitute in place of the Sanitary Inspector working in the Sakleshpur Taluk. The D.P.H. reports that no hands are available for the present with reference to para 31 & 32

36) Information received from the D.C. Shimoga shows that the Sanitary Inspector who has been of the Bhadravathi Taluk, has been deputed to some other work. Hence his services in this respect could not be secured

37) In the above circumstances, the matter for consideration is as to how the representations of such Sanitary Inspectors as are working in a position to be relieved from the Municipalities selected according to the schemes programme may should be made

From The Director of Agriculture.

No Se 290/43 & 28/7/44

From The D C Kurunegala

No A S 1277/43 & 2/8/44

For orders regarding the matter

43) It is seen from the result of progress of training of sanitary inspectors in the current scheme, that two sanitary inspectors in Kurunegala centre, two in Kegalle centre and 3 in Chilaw centre are getting trained. The scheme one is being trained in the Kegalle centre Tumkur, Galagedara, Kurunegala Kegalle Estates and Kandyan Sugar Board are said to have promised to send their respective sanitary inspectors in due course. The Kandyan, Dumbara, Uda Walawe, Kotmale, Bhadrawathie and Nawanagala Estates are said to have expressed their inability to depute Kandyans for the training. Galagedara Estate also is not willing to spare the inspectors

44) As the Kandyan Estates are not willing to spare hands, the training period is said to have been reduced

All India comfort scheme -

47 from three months to 6 weeks at the divisional centres, followed by another six weeks training in their respective centres

45) In the above circumstances, the Director of Agriculture may perhaps depute assistant bio-chemists to train sanitary inspectors of such cities as are not in a position to send their respective sanitary inspectors for being trained in the Divisional centres

46) subject to remarks with reference to para 40 supra

9/8 47) The report received from the Director of Agriculture about the progress made in the training of sanitary inspectors in Cumpost manufacture scheme is awaited. No response from the Govt has not been as earnest as anticipated or in accordance with the order of Govt in this behalf. Hence the scheme has been modified from 3 months to six weeks. As a result framing of the modified programme may perhaps be watched. It is however essential that, in view of the practical assistance rendered by the supervising cadre of Agricultural Assts. a large number of sanitary inspectors should be trained

No 4 F 3459 61—Agri 245 42 20, dated 20th January 1944

ENCLOSURE III

Schedule of terms to be observed in connection with the scheme of composting town refuse into manure in the Mysore State, financed by the Imperial Council of Agricultural Research

(i) That the grant will not be regarded as a subvention towards the normal work of the State Agricultural Department but will be exclusively utilised for the scheme mentioned above

(ii) that six monthly reports on the progress of the work under the scheme will be submitted to the Council the first report being submitted in March 1944

(iii) that the expenditure incurred from the grant will be audited by the Comptroller Mysore State who will furnish the Accountant General Central Revenues New Delhi with an annual certificate that he had done so and that the grant had been spent on the objects for which it was made any unspent balance being refunded to the Council on the termination of the scheme

(iv) that the financial assistance rendered by the Council will be acknowledged in any published account of the work for which the grant is given

(v) that the Council will have a right to publish the results of the investigation now to be undertaken in its own journals before they are published elsewhere

(vi) that the equipment and apparatus purchased out of the grant given by the Council will be the property of the Council and that such items as are non perishable will be returned to the Council on the termination of the scheme

(vii) that the approval of this office will be taken if a higher pay than the initial pay of the sanctioned scale is granted to any of the staff included in the scheme

(viii) that the Government of Mysore will consult the Council before making any change in the arrangements for the supervision of the scheme or in the approved technical programme

(ix) that the State Government agree that they will take suitable steps to carry such of the results of this research into practice as are of practical value to the farmers

(x) that if a servant of the State Government is deputed for work under the scheme the savings that accrue to the Government owing to the appointment of a substitute in his place on a lower rate of pay shall be credited to the funds of the Council

WD 1,36—GP6—3.0— 7 4

Copy of letter No.Sc.290/42-43, dated 4th March 1944 from the Director of Agriculture in Mysore to the General Secretary to the Government of Mysore.

All India Compost Scheme.

With reference to G.O.No.A.F.3459-61/Agri. 245-48-26 dated 20t January 1944 sanctioning the Compost Scheme of the Imperial Council of Agricultural Research, I have the honour to forward herewith detailed proposals for the operation pf the programme of work outlined in Enclosure II of the above Government Order.

(1) During the period the training of Assistant Bio-Chemists i progressing in February and March 1944, the Bio-chemist will visit selected towns with a view to examining their suitability and for making preliminary arrangements for initiating compost work to enable the Assistant Bio-Chemists to be posted after their training These Headquarters centres, three in number would serve for the training of batches of the Sanitary Inspectors later on.

The State could be divided into three convenient groups of three districts each, viz., Mysore, Hassan and Mandya into one natural group, Bangalore, Tumkur and Kolar into a second group and Shimoga, Kadur and Chitaldrug into a third group. Mysore City, Bangalore and Shimoga would form headquarters centres for each of the three groups respectively and the Sanitary Inspectors drawn from the towns within each group would be trained at these respectiv centres.

The first batch of 18 Sanitary Inspectors whose training is scheduled to commence from 1st June 1944, are to be drawn from the various municipalities. The following municipalities would appear to be suitable for working the scheme during the 12th to 18th months period.

Mysore Centre

Mysore District	Hassan District	Mandya District
Mysore City	Hassan	Mandya
Chamarajanagar	Saklespur	Malavalli

Bangalore Centre

Bangalore District.	Tumkur District	Kolar District
Bangalore City	Tumkur	Kolar
Channapatna	Tiptur	Chickballapur

Shimoga Centre.

Shimoga District.	Chitaldrug District.	Kadur District
Shimoga	Chitaldrug	Chickmagalur
Bhadravati	Davangere	Tarikere.

In inviting your kind reference to para 2 of your letter No.A.F. 3456-Agri- 245-42-19 dated 20-1-44, addressed to the Secretary, Imperial Council of Agricultural Research, I request that the above list of municipalities may kindly be communicated to the Secretary Imperial Council of Agricultural Research.

(PTO)

In this connection, I request that Government may be pleased to issue necessary instructions to the authorities of the above mentioned municipalities to depute sanitary inspectors for a period of three months to undergo the training in compost work at their respective headquarters centres as from 1st June 1944 and to provide all facilities required by the Bio-Chemist of the Compost Scheme to start compost work on demonstration lines in the several municipalities.

The second list of the 10 municipalities where the scheme is to be initiated in the succeeding six months period will be prepared after examination of the success of the choice now made and after consulting other municipalities.

A note on the process of compost making to be adopted by the municipalities and a scheme for making the process on a demonstration basis in each individual municipality is being prepared and will be forwarded in due course.

Under these circumstances, I request that Government may be pleased to take very early action to address the municipalities to arrange for deputing the sanitary inspectors for compost training in proper time and to give another other facilities to the Bio-chemist for initiating and conducting compost work.

Copy of letter No.Sc.290/42-43, dated 4th March 1944 from the Director of Agriculture in Mysore to the General Secretary to the Government of Mysore.

Sir,

Re Training of Sanitary Inspectors of Hassan and Saklespur Town Municipalities in compost making

---

With reference to your letter No L 10895-903/W1 189-43-2 dated 27-4-44 directing that the Municipalities concerned may be instructed to depute the Sanitary Inspectors to undergo training for 3 months from 1st June 1944, I have the honour to state that the President of Saklespur Town Municipality has reported that this being the tail end of the official year there will be lot of public works, collection, sales and Pation Census work which have to be attended to by the Sanitary Inspect that it is not possible to get through these works with the help of oth officials, and that his selection for training at present may be cance etc,

In view of the said report the Pation Census ork and the supervision of the Municipal Depot that has to be attended to by the Sanita Inspector, I request that his selection for training during this sessi may be cancelled He may be selected for the next session when there will be light work in the Municipality

The President of Hassan Town Municipality has also reported th no substitutes have been posted from a long time in place of the Asst Sanitary Inspector for Malaria control and the Vaccinator transferred from this Municipality and that if the present Sanitary Inspector is also relieved for training without a substitute, the work in the Munici

Municipality will suffer etc In these circumstances, I request that the Director of Public Health may kindly be requested to post a substitute to Hassan Town Municipality immediately and if no hands are available the selection of this Sanitary Inspector for compost training may be cancelled

I have the honour to be,
Sir,
Your most obedient Servant,

Deputy Commissioner,
Hassan District

Sir

Subject - Compost Scheme of Agricultural Research Training of Sanitary Inspectors

With reference to your letter No 10895-903/M1 189-43-2 dated 27th April 1944, on the subject noted above, I have the honour to state that a copy of this letter had been forwarded to the Presidents of Shimoga and Bhadravati Municipalities for action accordingly

2 The Municipal President, Shimoga states that he relieved the Assistant Sanitary Inspector of the Municipality on the after noon of 31st May 1944, with the directions to report himself to the - Assistant Bio-Chemist at Shimoga on 1-6-1944 for undergoing training

3 The President states(vide his letter No C.S 58/43-44 dated 7-6-1944) that the necessary facilities required by the Assistant Bio-Chemist have been given

4 The Municipal Council has at its meeting held on 6-6-44, sanctioned a sum of Rs 450/- towards the expenditure to be incurred in this connection - vide resolution copy enclosed for favour of - reference The expenditure in question is proposed to be met from the provision made under the head E2-E conservancy and Sanitation in the current year's sanctioned Budget of the Municipality

5 As regards the Sanitary Inspector of the Bhadravati Municipality, I write to state that the Assistant Sanitary Inspector of the Municipality has been deputed to work in the Health Units sanctioned

ENCL

TOWN MUNICIPAL COUNCIL

Shimoga, 31st May, 1944

From

THE PRESIDENT,
TOWN MUNICIPAL COUNCIL, SHIMOGA

To The Deputy Commissioner,
Shimoga District, Shimoga

Sir,

With reference to your Memo No M3 Pl 485/43-44 dated 10th instant forwarding copy of a letter No.L 10896-903/M1.189-43-2 dated 27-4-44 re the scheme of Composting Town refuse into manure etc , I have the honour to state that necessary facilities required by the Assistant Bio-Chemist have been given The Assistant Sanitary - Inspector has also been relieved of his duties this day afternoon and directed to report for duty to the Asst Bio-Chemist on 1-6-44 for undergoing training for a - period of six weeks

I have the honour to be,
Sir,
Your most obedient servant,

3 JUN 1944 M3

President,
Shimoga Town Municipality

Schedule as approved by Government Consequently the various municipalities

REPORT OF PROGRESS OF TRAINING OF SANITARY INSPECTORS IN THE COMPOST SCHEME -

The training of Sanitary Inspectors commenced on the 1st of June 1944 according to schedule at the three divisional Centres, Mysore, Bangalore and Shimoga, where the Compost production work had been brought into routine operation Each Centre was expected to receive six Sanitary Inspectors from different municipalities as stated in letter No L 10895-903/ M1-189-43-2, dated 27th April 1944, from the Secretary to Government of Mysore, Law Department to to the Deputy Commissioners of Districts He ever varying numbers of municipalities deputed their men and the Sanitary Inspectors who actually reported for training were distributed as follows :

Bangalore Centre---2 (Chennapatna and Chickballapur)
Mysore Centre -----2 (Mandya and Malavalli)
Shimoga Centre ----3 (Shimoga,Tarikere and Chickmagalur)

In addition from the beginning of July an assistant Sanitary Inspector deputed by the Mysore City Municipality has been receiving training at the Mysore Centre, and the Mysore Sugar Company, Mandya have expressed a desire to send a man for receiving the training at that centre in the course of this month

Tumkur and Saklespur municipalities are sending their Sanitary Inspectors at the end of July, while Bangalore and Tiptur are likely to depute their men in the near future No reply has been received from the Chamarajnagar municipality, while six other municipalities(Hassan, Davanagere, Chitaldrug, Kolar, Bhadravati and Nanjangud) have expressed their inability to send their men for the training for a variety of reasons

In consideration of the difficulties expressed by a number of municipalities in having to depute their men for training for a long period like three months at a time of their busiest activity of the year, it was decided to curtail the actual period of theoretical and practical instructions at the divisional Centre to a period of six weeks,of training to be followed by another six weeks of training in Compost organisational work at their own respective municipalities, so as to keep with the original programme of three months' training approved by Government The Programme of the revised Six Week's training has been submitted to Government early in June and a copy of same is herewith submitted for ready reference

In view of the urgency of the need for producing as large a quantity of Compost as possible,in a short time, it is intended to train as many Sanitary Inspectors as will report during the three month period June-August of the Schedule as approved by Government Consequently the various municipalities are

are being contacted again and requested to depute their men even now so that they can be given a shorter period of intensive training and sent back to their respective Municipalities to start the actual Compost production work in the months following August this year

Sir

Subject Compost Training to Sanitary Inspectors

With reference to your letter No L 213/M1 189-43-5 of 8-7-44 on the above subject, I have the honour to state - that the training of Sanitary Inspectors, commenced on 1-6-44 in the three centres, Mysore, Bangalore and Shimoga, and seven sanitary Inspectors in all underwent the training

In view of the various difficulties expressed by a number of Municipalities to depute their men for a long period of 3 months, the duration of the training was curtailed to 6 weeks at the Divisional centres, followed by another six weeks training in their respective places in compost organisational work, as intimated in this office No Sc 290/ 16 6 1944

A Progress Report of training, submitted by the Biochemist of the Scheme is enclosed herewith for kind information, along with the Programme of 6 weeks course.

I have the honor to be,
S i r,
-our most obedient servant,

Director of Agriculture

CO POST SCHEME--MYSORE STATE

TRAINING COURSE FOR SANITARY INSPECTORS

PROGRAMME FOR SIX WEEKS

1. Lectures - 4 Lectures per week (Mondays, Wednesdays, Thursdays and Fridays) 3 P.M - 4-30 P.M.

1. Discussion per week (Tuesdays 3 to 4-30 P.M.

1 Library period per week (Saturdays)

2. Practical work and Demonstrations 5 days in the week (except Saturdays and Sundays) Monday to Friday - Each day 8 A.M to 12 Noon (4 Hours)

3. Visits. Saturday mornings.

PRACTICAL WORK

Week 1 and 2. 5 mornings in the week - (probably Saturdays and Sundays to be excepted) - 1 morning per week allotted for visits on Saturday.

First two weeks Sanitary Inspectors visit the Compost Depot and are taught by the Asst. Biochemist practical details regarding (a) optimum size of trenches, (b) Free Road Approach (c) Proportions of Katchra to night soil (d) Precautions to be adopted in proper layering of Katchra and night soil (e) Need for earth cover (f) Fly counts (g) Measurement of Temperature (h) Decomposition of manure at different time intervals (i) methods of sampling manure for observation and analysis The demonstrations will also be included in this period.

Weeks 3 and 4 Sanitary Inspectors are put in charge of the Compost Depot on successful days, and made to supervise the work with the help of the Registry in charge of the Depot, and submit daily reports of the work done which will be scrutinised by the Asst Biochemist

On days on which two Sanitary Inspectors are in charge of the Depot, others will be given other types of practical work e.g., measurements of Temperature, fly counts, examining old trenches etc

Weeks 5 and 6 The Sanitary Inspectors would manage the Depot in rotation, without the help of the Registry in charge and give daily reports. The Assistant Biochemist would pay visits and satisfy himself that the Depot has been managed properly by the Sanitary Inspectors

The Other Inspectors would be assigned other types of work like measurements of Temperatures, etc

---

DEMONSTRATIONS

1 Proper filling of trenches
2 Examining moisture and temperature conditions
3 Different stages of fly development, maggots etc.
4. Indore, Mysore and Activated Compost methods on model scale
5 Microscopic views of Compost samples to show fungie etc
6 Temperatures and fly counts.
7 Over-ground heaps in rainy seasons or under special

7 Overground heaps in rainy seasons or under special local conditions and their management
8 Taking Compost samples from manure trenches.
9. ~~Examination~~ Examination of Compost Trenches

V I S I T S

(1) Other systems of disposal of Town refuse e.g., dumping in pits or hollows,
Incineration,
Trenching or other systems of disposal of N.S.(Smell and fly nuisance)
Disposal of sewage by letting into nallas, nallas or into the river

(2) Visits to neighbouring small town if any - their methods of disposal of refuse.

(3) Farm composting - Visits to Govt Agricultural farms Old methods Vs. Improved method.

( ) Visit to local slaughter house in order to examine methods of disposal of the wastes.

(5) Sewage Farms and other methods of Sewage Disposal

(6) Visits to see sceptic tanks, borehole latrines, trench latrines and small scale installations for collecting and utilising excreta of small groups of individuals.

(7) Visit to local Agricultural laboratories, if any, or farms

---

LECTURES FOR SANITARY INSPECTORS

1 Food Position in India Growth of human and animal ~~population~~ population food requirements increasing deficiency in recent decades total area under food crops - low yield per acre - low per capita area - poor nutritional standards - interdependence of different Provinces in the matter of food supply and exchange especially under war conditions - the distibution problem- need for self in India Sc contained in the matter of food

2 Food position in the State Growth of human and animal population in recent decades - food requirements - areas under different crops - per capita area - yield per acre for different crops in the State - imports and exports of foodstuffs

3 Methods of increasing food production With special reference to the State - increasing area under cultivation - area under irrigation - better seed and better manuring - practical possibilities and limitations of the different methods - all methods to be pursued In view of low yields per acre manuring is the most important problem - insufficient quantity and poor quality of F.Y.M. produced at present

4 Factors influencing Crop yields - Soil Types in the State with reference to their physical and Chemical qualities and organic matter level - ~~matrix~~ nutrition of plants, physical, chemical & microbiological factors - part played by organic matter in Soil-auximones and ~~Mycorrhizal~~ development - quality and quantity of crop produced Mycorrhizal

5. The Inter relationships between the economy of the Soil - Plant - animal systems Need for returning to the soil plant nutrients removed in crops consumed by human beings and by animals the role of the trace elements - the need for returning to the soil all farm and town wastes - the need for organic manures and their effect on quality and quantity of food produced - the insufficiency of artificials in this respect

6 The need for Composting Farm and Town Wastes.- Why farm and town wastes cannot be directly applied to soils as manure - bulky refuse (katchra) and nitrogenous concentrates in farm and town wastes - the harmful effect of bulky refuse on Crops - C/N ratio of materials and effect on nitrification in the Soil - sanitary objections to the application of nitrogenous wastes such as urine, nightsoil, slaughterhouse wastes etc , directly to the land - loss of nitrogen in narrow C/N ratios

7 Chemical and Biological principles underlying the preparation of organic manures from farm and town wastes Narrowing of C/N ratios of bulky refuse - need for addition of nitrogenous starter - advantageous of mixing bulky and nitrogenous waste in proper proportion optimum C/N ratio Fungal and Bacterial action - loss of organic matter and nitrogen during Composting - precautions for conserving organic matter and N as much as possible and obtain a manure of C/N ratio nearer 10 1 satisfying sanitary and aesthetic requirements

8. Historic review of different methods of Composting Preparation of f. y. m. - Chinese method - Adco process - Indore system Bangalore process - an economic considerations.

9 Present methods of disposal of farm Wastes. Number of animals, quantities of ingredient lost - improvements in the method of f. y. m. and farm Compost preparation - difficulties on account of small holdings and large number

10 Present methods of disposal of Town Wastes in Villages and Towns - Total quantity of night manurial ingredients in total population of State - crude system of disposal of dung and katchra by dumping - the Nasik system of its disposal - Indore method - the Trench method - economic Considerations and cost of production in the different methods.

11 Influence of Compost Manure on Soil, plant and humans Public Health and Sanitation - comparisons against artificials oil cakes etc , in quantity and quality - comparison of Compost and N S poudrette - influence of compost on irrigated and dry lands - influence of level of rainfall - dosage of manure

12 Hints about the Organization of Work under present Scheme Total number of urban centres in State with population over 3000 and total quantity of compost manure that could be produced Programme of work - time table of work in the Municipalities - only a few be started on a demonstration scale in the beginning

13. Chemical and Biological Principles underlying the Trench Method. - Average chemical analyses of town wastes e. g., katchra, nightsoil, sewage, slaughterhouse wastes etc , the proper -- proportioning between these to get initial C/N ratio narrower than 30 1 - thickness of katchra and night soil layers - - advantages of trenches - moisture level - temperature rise - fungus action - optimum depth of trenches and period of decomposition - development of maggots and their Control - earth cover methods of sampling for analysis

14 Organisation and maintenence of Compost Depot (1) Population (2) Type of Factra and N S (3) Sullage Water and Slaughter-house wastes (4) excessive dr ing and addition of water (5) refillin sunken trenches (6) precautions in the Dry season (7) in ein -- ge on (8) necessity of roads on both sides (9) thic ness of N.S layers (0) Excess of Katchra or N S (11) Dist nce of N S Depot

outine tests and obser rations to be ade in the Depot, ethods t ing out s mples for anal sis

15 Sale of Compost Manure - eed for propaganda contact with ural dev lopment bodies - price of manure - distance from municipal de ot - sie ing of manure - loading farmers carts - need for depots at both end of to ns

GOVERNMENT

Sir,

I am directed to forward a copy of a letter from the Central Government, Education, Health and Lands Department No F 33-18/44-P, dated the 11th August 1944, together with a copy of a letter from the Chief Biochemist, Imperial Council of Agricultural Research, Nagpur, No 441/44, dated the 9th June 1944, and to request that, if there is no objection

objection, early action may kindly be taken and all possible efforts made to utilise the compost produced under the schemes to the best advantage in furtherance of the 'Grow More Food' campaign in the State.

2. I am to say that paragraph 3 of the Government of India letter mentioned above is also intended to apply to the Mysore State.

I have the honour to be,
Sir,
Your most obedient servant,

For SECRETARY TO THE RESIDENT.

HR

B/8C Mo.Pd.

No.F.33-18/44-P.
GOVERNMENT OF INDIA.
Department of Education, Health and Lands.
New Delhi, the 11th August, 1944

OFFICE OF THE MINISTER FOR L S G & P H
Date - 12-9 44
No 1989

From

B Sahay, Esquire, I.C.S.,
Deputy Secretary to the Govt. of India,

To

All Provincial Governments and Local Administrations.

Sub - 'Grow More Food' Campaign - Town Refuse Composting Schemes - Intensification - Grant from the Central Revenues.

Sir,

I am directed to say that the compost manure which is likely to become available for use in the Rabi season 1944, from the Town Refuse Composting Schemes at present working under the control of the Imperial Council of Agricultural Research in various provinces and Local Administrations has been estimated as below -

Province/Local Administration.	Volume of Compost Manure in CFT.
Madras	200,000
Bombay	500,000
Bengal	150,000
United Provinces	300,000
Punjab	150,000
Central Provinces & Berar	300,000
Bihar	100,000
Orissa	75,000
Sind	25,000
Ajmer-Merwara	50,000

2 The Government of India desire that all possible efforts should be made to utilise the compost produced under these schemes to the best advantage in furtherance of the 'Grow More Food' campaign. The Government of India have been advised that although the compost would be of the required standard, there would be difficulties in getting cultivators to use it either due to ignorance of its value as a manure or due to prejudice against the use of a preparation of night soil. It is, therefore, suggested that in the first year arrangements should be made for the distribution of the compost among cultivators through the Agriculture Department free or on a subsidised basis. Where necessary, even transport may be arranged.

3 The Government of India would be prepared to sanction a grant to the Governments concerned from the Central Revenues at the rate of 12 annas per ton or annas 6 per 100 CFT in respect of compost distributed among cultivators during the Rabi 1944 and Kharif 1945 provided the total quantity distributed is not less than 10,000 tons or 20,000 CFT during the period. This rate of subsidy would be further enhanced by annas 4 per ton for every additional 10,000 tons of compost distributed to cultivators in the provinces i.e. the rate of subsidy for the first 10,000 tons will be 12 annas per ton, for the next 10,000 tons it will be Re 1/- per ton and for the next 10,000 tons at Re. 1/4/- per ton and so on. It is hoped that with the help of this subsidy it will be possible for the Governments concerned to make

suitable...

suitable arrangements with the municipalities [redacted] for the distribution of the compost among the cultivators through the agency of their Agriculture Department.

I have the honour to be,
Sir,
Your most obedient servant,

DEPUTY SECRETARY.

'Bahuguna'
60-D.10.8.44

Copy of letter No.441/44, dated the 9th June, 1944, from Dr.C.N.Acharya, Chief Biochemist, Imperial Council of Agricultural Research Nagpur.

Sub - Compost Scheme - Estimates of production for the rabi season 1944.

With reference to the discussion we had at New Delhi on Saturday, 27th May 1944, I am herewith submitting for your information an estimate of the total production of Compost-manure that is likely to become available for use in the rabi season 1944, from data supplied by Provincial and State Biochemist.

Provinces.	Volume of compost manure in CFT	
1. Ajmer-Merwara	50,000	
2. Baroda State	150,000	
3. Bengal	150,000	
4. Bihar	100,000	
5. Bombay	500,000	
6. Central Provinces & Berar	300,000	
7. Gwalior State	25,000	
8. Hyderabad State	100,000	
9. Madras	200,000*	(estimated, Report not yet received)
10. Mysore State	100,000	
11. Orissa	75,000	
12. Punjab	150,000	
13. Sind	25 000	
14. Travancore State.	175,000	
15. United Provinces.	300,000	
	2,400,000 Cft.	

2. The quantities of manure are expressed by volume in Cft. as this is a more easily measurable quantity in municipal Compost depots than determining weights of refuse and manure. On an average, however, 100 Cft. of ripe Compost may be taken to weigh about 2 tons. Hence the total estimated production for the rabi season may average about 48,000 tons for the whole of India.

3. The above estimated production represents the quantity of manure that has been prepared after the initiation of the present Compost Scheme viz from 1st August 1943 at Centres started and run for the present Scheme, including (a) centres run for the purpose of training Provincial and State Biochemists during the period August - December 1943, (b) centres organized by the Provincial or State Biochemists for training Assistants Biochemists during the period January - March 1944, (c) organized by the above Assistant Biochemists at Divisional Centres for the purpose of training Sanitary Inspectors during the period April - June 1944 and (d) centres that may be organized by Sanitary Inspectors at their respective municipal centres after their training.

4. If Government decide to purchase the available manure, for distribution to farmers free of cost, with a view to demonstrate to them the manurial value of the Compost, I would recommend that a rate of Rs 3/- per 100 cft. of manure may be fixed as purchase price, (which would work out to about Rs.1/8/- per ton.) This price would in most cases cover the cost of production. In special areas, however, where labour charges are very high and the municipality adduces evidence that their production expenses exceed Rs 3/- per 100 cft. of manure, the purchase price may be increased upto Rs.5/- per 100 cft. I expect that such areas would be few and the quantity that may be paid for at higher rates may not exceed.....

3. The Government of India would be prepared to sanction a grant to the Governments concerned from the Central Revenues at the rate of 12 annas per ton or annas 6 per 10 CFT in respect of compost distributed among cultivators during the Rabi 1944 season provided the total quantity distributed is not less than 10,000 tons or 50,000 CFT during the period. This rate of subsidy would be further enhanced by annas 4 per ton for every additional 10,000 tons of compost distributed to cultivators in the provinces i.e.; the rate of subsidy for the first 10,000 tons will be 12 annas per ton, for the next 10,000 tons it will be Re.1/- per ton and for the next 10,000 tons at Re.1/4/- per ton and so on. It is hoped that with the help of this subsidy it will be possible for the Governments concerned to make suitable arrangements with the municipalities concerned for the distribution of the compost among the cultivators through the agency of their Agriculture Department.

[illegible] dated Nagpur, the 7th June, 1944, from the Dr.C.N. Acharya, Chief Biochemist, Imperial Council of Agricultural Research, Nagpur.

Subject:- Compost Scheme - Estimates of production for the rabi season 1944.

With reference to the discussion we had at New Delhi on Saturday, 27th May 1944, I am herewith submitting for your information an estimate of the total production of Compost-manure that is likely to become available for use in the rabi season 1944, from data supplied by Provincial and State Biochemist.

PROVINCE		VALUE OF COMPOST MANURE IN CFT.	
1. Ajmer-Merwara	...	50,000	
2. Baroda State	...	150,000	
3. Bengal	...	150,000	
4. Bihar	...	100,000	
5. Bombay	...	500,000	
6. Central Provinces & Berar	...	300,000	
7. Gwalior State	...	25,000	
8. Hyderabad State	...	100,000	
9. Madras	...	200,000*	(estimated
10. Mysore State	...	100,000	report
11. Orissa	...	75,000	not yet
12. Punjab	...	150,000	received)
13. Sind	...	25,000	
14. Travancore State.	...	175,000	
15. United Provinces	...	300,000	
		2,400,000 cft	

2. The quantities of manure are expressed by volume in cft. as this is a more easily measurable quantity in municipal compost depots than determining weights of refuse and manure. On an average, however, 100 cft. of ripe compost may be taken to weigh about 2 tons. Hence the total estimated production for the rabi season may average about 48,000 tons for the whole of India.

3. The above estimated production represents the quantity of manure that has been prepared after the initiation of the present Compost Scheme viz. from 1st August 1943 at Centres started and run for the present scheme, including (a) centres run for the purpose of training Provincial and State Biochemists during the period August - December 1943, (b) centres organized by the Provincial or State Biochemists for training Assistants Biochemists during the period January March 1944, (c) organized by the above Assistant Biochemists at Divisional Centres for the purpose of training sanitary inspectors during the period April - June 1944 and (d) centres that may be organised by Sanitary Inspectors at their respective municipal centres after their training.

4. If Government decide to purchase the available manure, for distribution to farmers free of cost, with a view to demonstrate to them the manurial value of the Compost, I would recommend that a rate of Rs 3/- per 100 cft. of manure may be fixed as purchase price, (which would work out to about Rs.1/8/- per ton) This price would in most cases cover the cost of production. In special areas, however, where labour charges are very high and the municipality adduces evidence that their production expenses exceed Rs 3/- per 100 cft. of manure, the purchase price may be increased upto Rs 5/- per 100 cft. I expect that such areas would be few and the quantity that may be paid for at higher rates may not exceed ~~400~~ 4,00,000 cft. out of an estimated total production of 2,400,000 cft.

5. The total amount that would be required as subsidy for the present purpose of purchase of manure would be as follows -

2000,000 cft.of manure) @ Rs.3/- per 100 cft.)	Rs.60,000
400,000 cft. of manure) @ Rs.5/- per 100 cft.)	Rs.20,000
	Rs.80,000

H Srinivasan
Dy. Secretary to Govt.

exceed 400,000 cft. out of an estimated total production of 2,400,000 cft.

5. The total amount that would be required as subsidy for the present purpose of purchase of manure would be as follows -

2,000,000 cft. of manure @ Re.3/- per 100 cft.	Rs. 60,000
400,000 cft. of manure @ Re.5/- per 100 cft.	Rs. 20,000
	Rs. 80,000

Letter No.Sc.290/43-44 dated 5th October 1944 from the Director of Agriculture in Mysore, to the General Secretary to Government

Ref - G.O.No.A.F.3459-61/Agri.245-42-20 dated 20-1-44 re the programme of work for compost training to be given to Sanitary Inspectors

In continuation of this office letter of even No. of 4-3-1944 I have the honour to state that the training for the second batch of Sanitary Inspectors should commence from 1-1-1945 as per G.O.cited above, and to request that Government may be pleased to take very early action to address the marginally noted Municipalities to depute their Sanitary Inspectors in proper time

1) Bangalore Training Centre

Bangalore District	(a) Dodballapur (b) Closepet
Tumkur District	(c) Sira (d) Kunigal
Kolar District	(e) K.G.F. (f) Chintamani.

2) Mysore Training Centre

Mysore District	(a) Hunsur (b) Gundlupet
Hassan District	(c) Holenarasipur (d) Arsikere
Mandya District	(e) Nanjanagudu Seringpatam
	(f) Maddur.

3) Shimoga Training Centre.

Shimoga District	(a) Sagar (b) Channagiri
Kadur District	(c) Birur (d) Kadur
Chitaldrug	(e) Harihar (f) Challakere

In view of the fact that several Municipalities pleaded their inability to depute their Sanitary Inspectors for training for a long period of 3 months, the programme for the previous batch was drawn up for six weeks' training in the Divisional Centres followed by a six weeks' training in their own towns, as reported in this office letter No Sc.290. dated 16-6-1944. Similar procedure will have to be followed with the second batch of trainees also.

I request for favour of approving the modification in programme and to arrange for addressing the authorities concerned for deputation of the Sanitary Inspectors

SCHEME FOR COMPOSTING TOWN REFUSES INTO MANURE(I C R R)

Progress of work in the Mysore State from the 1st August 1944 to 31st January 1945

THIRD HALF-YEARLY REPORT

TOWARDS THE END OF THE PERIOD covered by the last report, the training of nine Sanitary Inspectors of the first batch were completed at the three training centres of the State and the men sent back to their respective towns to start the work During August 44 the work of conducting production of compost in their Municipalities was guided and the requisite technical assistance given In addition to the above 9, four more sanitary Inspectors were deputed during August and September and these were given a short course of intensive training at the Bangalore and Mysore centres On the return of these men to their respective towns, they too were helped to start the work and corduct the same on proper lines During this period, while the work was being carried on in the Municipalities by the trained sanitary Inspectors, the Bio Chemist and the Assistant Bio chemists visited the other Municipalities which, for some reason or other could not depute their men to receive the training By arrangement with these municipalities, the visits were utilised for giving instructions to the Sanitary Inspectors on the principles involed in the processes and the method of preparing compost Simultaneously with these instructions, the practical aspects of the work were demonstrated by starting the actual work of compost production Thus, by the end of December the work had been started in 17 centres out of the intended total 18 in the first set, as the following statement of progressive development of the work shows:-

Month (1944)	Number of Municipalities brought into working condition	Gross total of compost production in C Ft
August	10	119,300
September	11	158,000
October	13	210,000
November	17	240,000
December	17	287,000

A total of nearly 290,000 C Ft or about 6000 tons of manure had been prepared by the end of December '44 It may be stated here that the target set by the Chief Bio Chemist of the Scheme for Mysore State in his programme of All- India Compost production for the Rabi Season '44 was 100,000 C Ft and hence the actual production had been in excess of this target figure

In addition to the above work, at the request of the authorities of the Govt

~~Implements Factory, Ichoor, work was started at the end of~~

P T O

Government Implements Faftory, Hassan, work was started at the end of October, on the production of compost from the collections of the varietv of organic waste materials from the staff and labour colony attached to this Factory

In connection with the annual exhibition held at Mysore City during the Dasara festivitı-s, compost demonstrations were organised as apart of the exhibits of the State Agricultural Department from the 18th September to the 4th of October Besides the large number of interesting posters and placards that were desplayed, the methods of manufacture of town refuse compost and the improved methods of farmyard manure and farm Composts preparation were demonstrated both on model and large scales This Exhibition, as usual, attracted many thousands of visitors and the educative value of the compost demonstrations were considered large

TRAINING OF THE SECOND BATCH SANITARY INSPECTORS

In pursuance of the programme of work approved by Government in their G O No 3459/61 Agri 245-42-20 dated 20-1-44, the training of the second batch of 18 Sanitary Inspectors was taken up during January '45 The varying numbers of men deputed by the Municipalities and who actually reported for training during the month were distributed as follows -

Training Centre	No of Sanitary Inspectors reported for training
Bangalore	2
Mysore	3
Shimoga (S I of Shimoga Municipality)	4 (including a new

While one of the second batch of 18 Municipalties has already got a sanitary Inspector trained in the earlier batch, and so can start the work straight away, four other municipalities are likely to send their men for training during the month of February

In accordance with the procedure adopted with the first batch of trainees, it is intended to give the Inspectors an intensive training for a period of about 6 weeks only at the training centres on the theoretical and practical aspects of compost making and then to send them back to their respective towns to carry out the organisational and production work under the guidance of the Bio chemist and the concerned Asst Bio chemist to complete the three month period of training originally fixed Further, it is intended that for such of those towns as could not depute a man, the Bio chemist or his assistant would proceed there and

P T O

and start the work while giving training to the local sanitary inspector on the best lines of conducting the work

TRAINING OF ASSISTANT FROM COORG:- At the request of the Coorg Government, the Government of Mysore in letter No Pol 1150 dated 28-11-44 from the General Secretary addressed to the Secretary to the Hon'ble the Resident in Mysore, have permitted one Agricultural Demonstrator from Coorg to receive the Compost training in Mysore State, and this officer is receiving training at Banga-lore since 12-1-45 under the Bio Chemist and the Assistant Bio Chemist On the return of this officer after his training, it is expected that Coorg also will commence producing Town refuse compost from about March '45

SALE OF TOWN REFUSE COMPOST - Simultaneously with the drive to produce large quantities of compost, efforts are continually being made to popula-rise the use of compost prepared with night-soil, and to persuade the farmers to use large quantities of this manure for their food crops Recently Govern-ment in their Order No 1672 Agri 344-43-2 dated 9th September 44 have sugg-sted to the various municipalities that they may keep down the price of compost to a reason blly low level of about Rs 1-8-0 per ton and make the manure available to as large a number of farmers as possible Between the period from 1st September to end of January 45, 70,000 C Ft or nearly 1,500 tons of compost have been disposed off by a number of the Municipalities and it is anticipated that during the coming Kharif season considerably grater quantities will be disposed off Further, with a view to benifit the farmers from the offer of the Central Government to grant a subsidy of As 12/- for every ton of this manure disposed off, efforts are being made to bring about the distribution of the requisite minimum of atleast 10,000 tons within the stipulated period, to claim the subsidy grant To this end intensive efforts on propaganda through the demonstration sections of the Agricultural Department, the Rural Development Department, and other agencies are being made

S V Govindarajan

BIO-CHEMIST,
COMPOST SCHEME, MYSORE STATE.

21/2

APPENDIX TO THIRD HALF YEARLY PROGRESS REPORT

Period February - May 1945

In continuation of the latest progress report submitted to Government and the Imprerial Council of Agricultural Research early in February 1945, the following statement is given to indicate the progress of compost production and distribution at the various centres in the State

Month	Pregress of compost production in C Ft	Sales during the Month C Ft	Total sales From 1-6-44 C Ft
January 1945	341,190	49,790	66,200
February '45	393,160	35,750	101,950
March '45	565,160	147,520	249,470
April '45	650,000	Data incomplete and figures given are approximate	
May '45	750,000		

On the average 50 C Ft of compost makes one ton and the value realised by the Municipalities for the sale of this manure has ranged from Re 1/- to nearly Rs 5/- per ton in different centres in the State

In addition to the 9 Sanitary Inspectors who reported for training in the different centres during J nuary 1945, the Assistant Sanitary Inspector from Maddur received training at Mysore during February and March, and the Assistant Sanitary Inspector from Closepet and a Sanitary Inspector from Bangalore city Municipality received training at Bangalore during the month of May During April the three Sanitary Inspectors attached to the Kolar Gold Fields, Sanitary Board were given instructions on the principles of compost making and the work demorstrated to them at the newly started compost depot at Andersonpet

While most of the second batch Sanitary Inspectors who have returned to their centres after training have been able to start the work promptly, some have to wait to about July next to start the work owing to difficulties in the way of availability of suitable land for forming the compost depot and for the termination of the present contracts for rubbish removal held by private parties Among the Municipalities of the above category are Kunigal, Holenarsipur, Arsikere and Closepet

PROPOSALS FOR CONTINUANCE OF THE SCHEME

The present two year scheme for organising compost production out of town wastes sponsored by the Imperial Council of Agricultural Research will terminate on the 31st July 45, unless extended In view of the importance of the work and the incomplete state in which the organisation of production and distribution are at the present date, proposals for a three year extension of the above scheme to enable the work already started in the different municipalties to be stabilised and work taken up in other municipalities have recently been submitted to Government for their consideration and obtaining ~~sanction~~ assent of the Imperial Council of Agricultural Research
